SIAFIMPIANTI SRL

INDUSTRIAL FLOW MANAGEMENT & DOSING

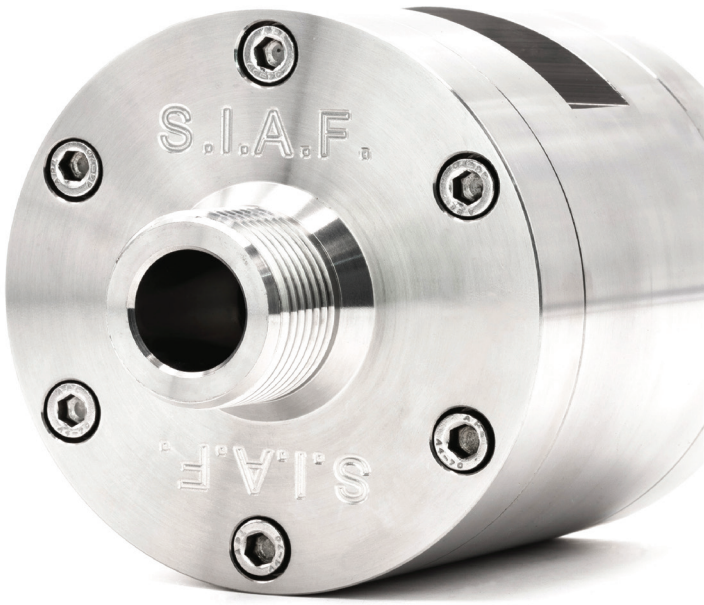
INOXMECC Siaf Impianti is the Group's division dedicated to the industrial flow dosing sector.
The ongoing research for new challenges and the desire to expande in response to the most different Customers' requests have pushed **INOXMECC** to the acquisition of **SIAF IMPIANTI,** incorporating more than 40 year of experience and more than 1.000 plants realized, which allow the company to guarantee each customer' solutions **"*exactly tailored*"**, with high quality standards.

Products & Services

- Hydraulic and electronics accessories
- Production of industrial flow meters
- Dosing panels
- Sale of water flow meters
- Design, research and development of plants

SIAF owns more than 70 models of flow meters (in AISI 316, DELRIN, RYTON and PEEK) that meet the different application needs of the end user with exactly and customized dosing systems.

The internal production of both hardware and software equipment allows SIAF to have the widest and most specialized production of **cards and electronic panels** in the sector with **over 30 models and 200 variants.**



The versatility of SIAF plant applications extends from food products to pharmaceuticals, hydrofluoric acid, caustic soda, lubricants and solvents.

Each SIAF instrument and flow meter is **manufactured in Italy, assembled and tested in its own laboratory**. The internal technical office is available for studying and building for its customers "***turnkey***" systems, pilot plants and prototypes for dosing, measuring and distribution of flows.
